## IN THE CLAIMS:

Please cancel claims 21-24 and 34-39:

## 1 - 24. (Cancelled)

25. (Currently Amended) A method of forming a profile in a section of tubing within a wellbore, comprising:

providing an expander device having at least one radially extendable expander member, wherein the expander member is extended by application of fluid pressure;

positioning the expander device in the wellbore at a predetermined location in the section of tubing; and

extending the <u>expander</u> member to deform the tubing at said location to create the profile in an internal face of the tubing.

- 26. (Previously Presented) The method of claim 25, wherein the profile is in the form of at least one annular recess.
- 27. (Previously Presented) The method of claim 25, wherein the tubing is deformed by rolling expansion, the expander member being rotated within the tubing with a face in rolling contact with [[an]] the internal face of the tubing.
- 28. (Previously Presented) The method of claim 25, wherein the tubing is deformed by compressive plastic deformation, producing a localised reduction in wall thickness and a subsequent increase in tubing diameter.
- 29. (Previously Presented) The method of claim 25, wherein the tubing is deformed by compressive plastic deformation, producing flow of wall material to create the profile.

- 30. (Previously Presented) The method of claim 25, wherein the expander member is in the form of a roller.
- 31. (Cancelled)
- 32. (Previously Presented) The method of claim 25, wherein a plurality of radially extendable expander members are provided.
- 33. (Previously Presented) The method of claim 25, wherein the expander member is rotated to create the profile.
- 34-39. (Cancelled)
